Mayor's Message

Happy Spring neighbors and friends.

As you have by now seen, we're making some great progress on our Hall Grounds Project which is on track to be completed before our July 1st Celebration! This outdoor activity area featuring Pickleball Courts, basketball net, new kids play structure, and a storage shed is a great addition to our Hall space for residents and families to take advantage of.

Additionally, this spring we are going to be coordinating a Spring Hall Grounds Clean Up and we're hoping many hands will make for light work. This will take place on May 11, 10 - 2pm.

On the municipal business side of things, since our last newsletter, there have been some changes to our Council. We saw two of our council members resign, as did our community's CAO. As a result, on May 22nd we'll be holding a Byelection to elect two new members to Council - voting will be at the Community Hall.

As a final reminder, and as we begin to move into warmer weather, we respectfully ask that when using the hall facilities and grounds, you care for and clean up when you're complete.

See you all on Canada Day!

Mayor Laurie Turner

No Mow May A Sustainability Initiative

Did you know that bees pollinate over 130 different agricultural crops in Canada and the US each year?

Bee pollination accounts for \$14 billion annually in improved crop yield and quality.

New Permit Process

On March 11, 2024, the province of PEI introduced a new service to streamline the permit process – an online permit application service for some property developments. This service is applicable to build accessory structures like decks and sheds on your properties. The benefit? **Instant Approval.**

Outlined in the details, to qualify, decks must be less than 592 sq ft and less than 24” above the ground, and sheds are to less than 215 sq ft or less and not connected to power or water.

For those curious as to ‘why’ permits are to be purchased prior to constructing a deck or shed on your property, the simple answer is Your Safety.

The province, and your municipality want to ensure that structures are planned, designed, and built in a safe and sound manner, compliant with island regulations and municipal bylaws.
